TEST

# Is your e-learning content compliant with the European Accessibility Act?

Quick accessibility test for your e-learning content.

As a learning professional, you know accessibility isn't just a technical checkbox—it's about making sure everyone can learn without barriers, regardless of their abilities. And now, with the **European Accessibility Act (EAA)** in force, it's also a legal requirement.

The regulation mandates that all online courses comply with international accessibility standards—specifically, **EN 301 549** and **WCAG 2.1 Level AA.**

This quick test is designed to help you assess whether your training content meets those standards. Go through each question, mark your answers and see if you're at risk... or on the right track.

## How to use this test

Mark "Yes" or "No" for each criterion below.

At the end, count your "Yes" answers to see your results.

## Section 1: Navigation & Course structure

| Question | Yes | No |
| --- | --- | --- |
| Can users navigate the course entirely using a keyboard (no mouse required)? | ☐ | ☐ |
| Does the content follow a clear hierarchy with proper headings and subheadings? | ☐ | ☐ |
| Are interactive elements (buttons, menus, icons, etc.) properly labeled? | ☐ | ☐ |
| Is the content compatible with screen readers? | ☐ | ☐ |

* Screen readers convert digital content into speech or braille. Common tools include NVDA, JAWS, and VoiceOver.

## Section 2: Multimedia content

| Question | Yes | No |
|---|---|---|
| Do all videos include captions and/or full transcripts? | ☐ | ☐ |
| Are all audio files accompanied by an accessible written transcript? | ☐ | ☐ |
| Do all meaningful images have descriptive alternative text (ALT)? | ☐ | ☐ |

* ALT text (alternative text) is a brief HTML attribute that describes an image for users who can't see it.

## Section 3: Interactive exercises & games

| Question | Yes | No |
|---|---|---|
| Can all exercises be completed using only the keyboard? | ☐ | ☐ |
| Do games or assessments provide textual feedback (not just visual or audio)? | ☐ | ☐ |
| Is color used along with other visual cues to convey information or results? | ☐ | ☐ |

## Section 4: Visual design & adaptability

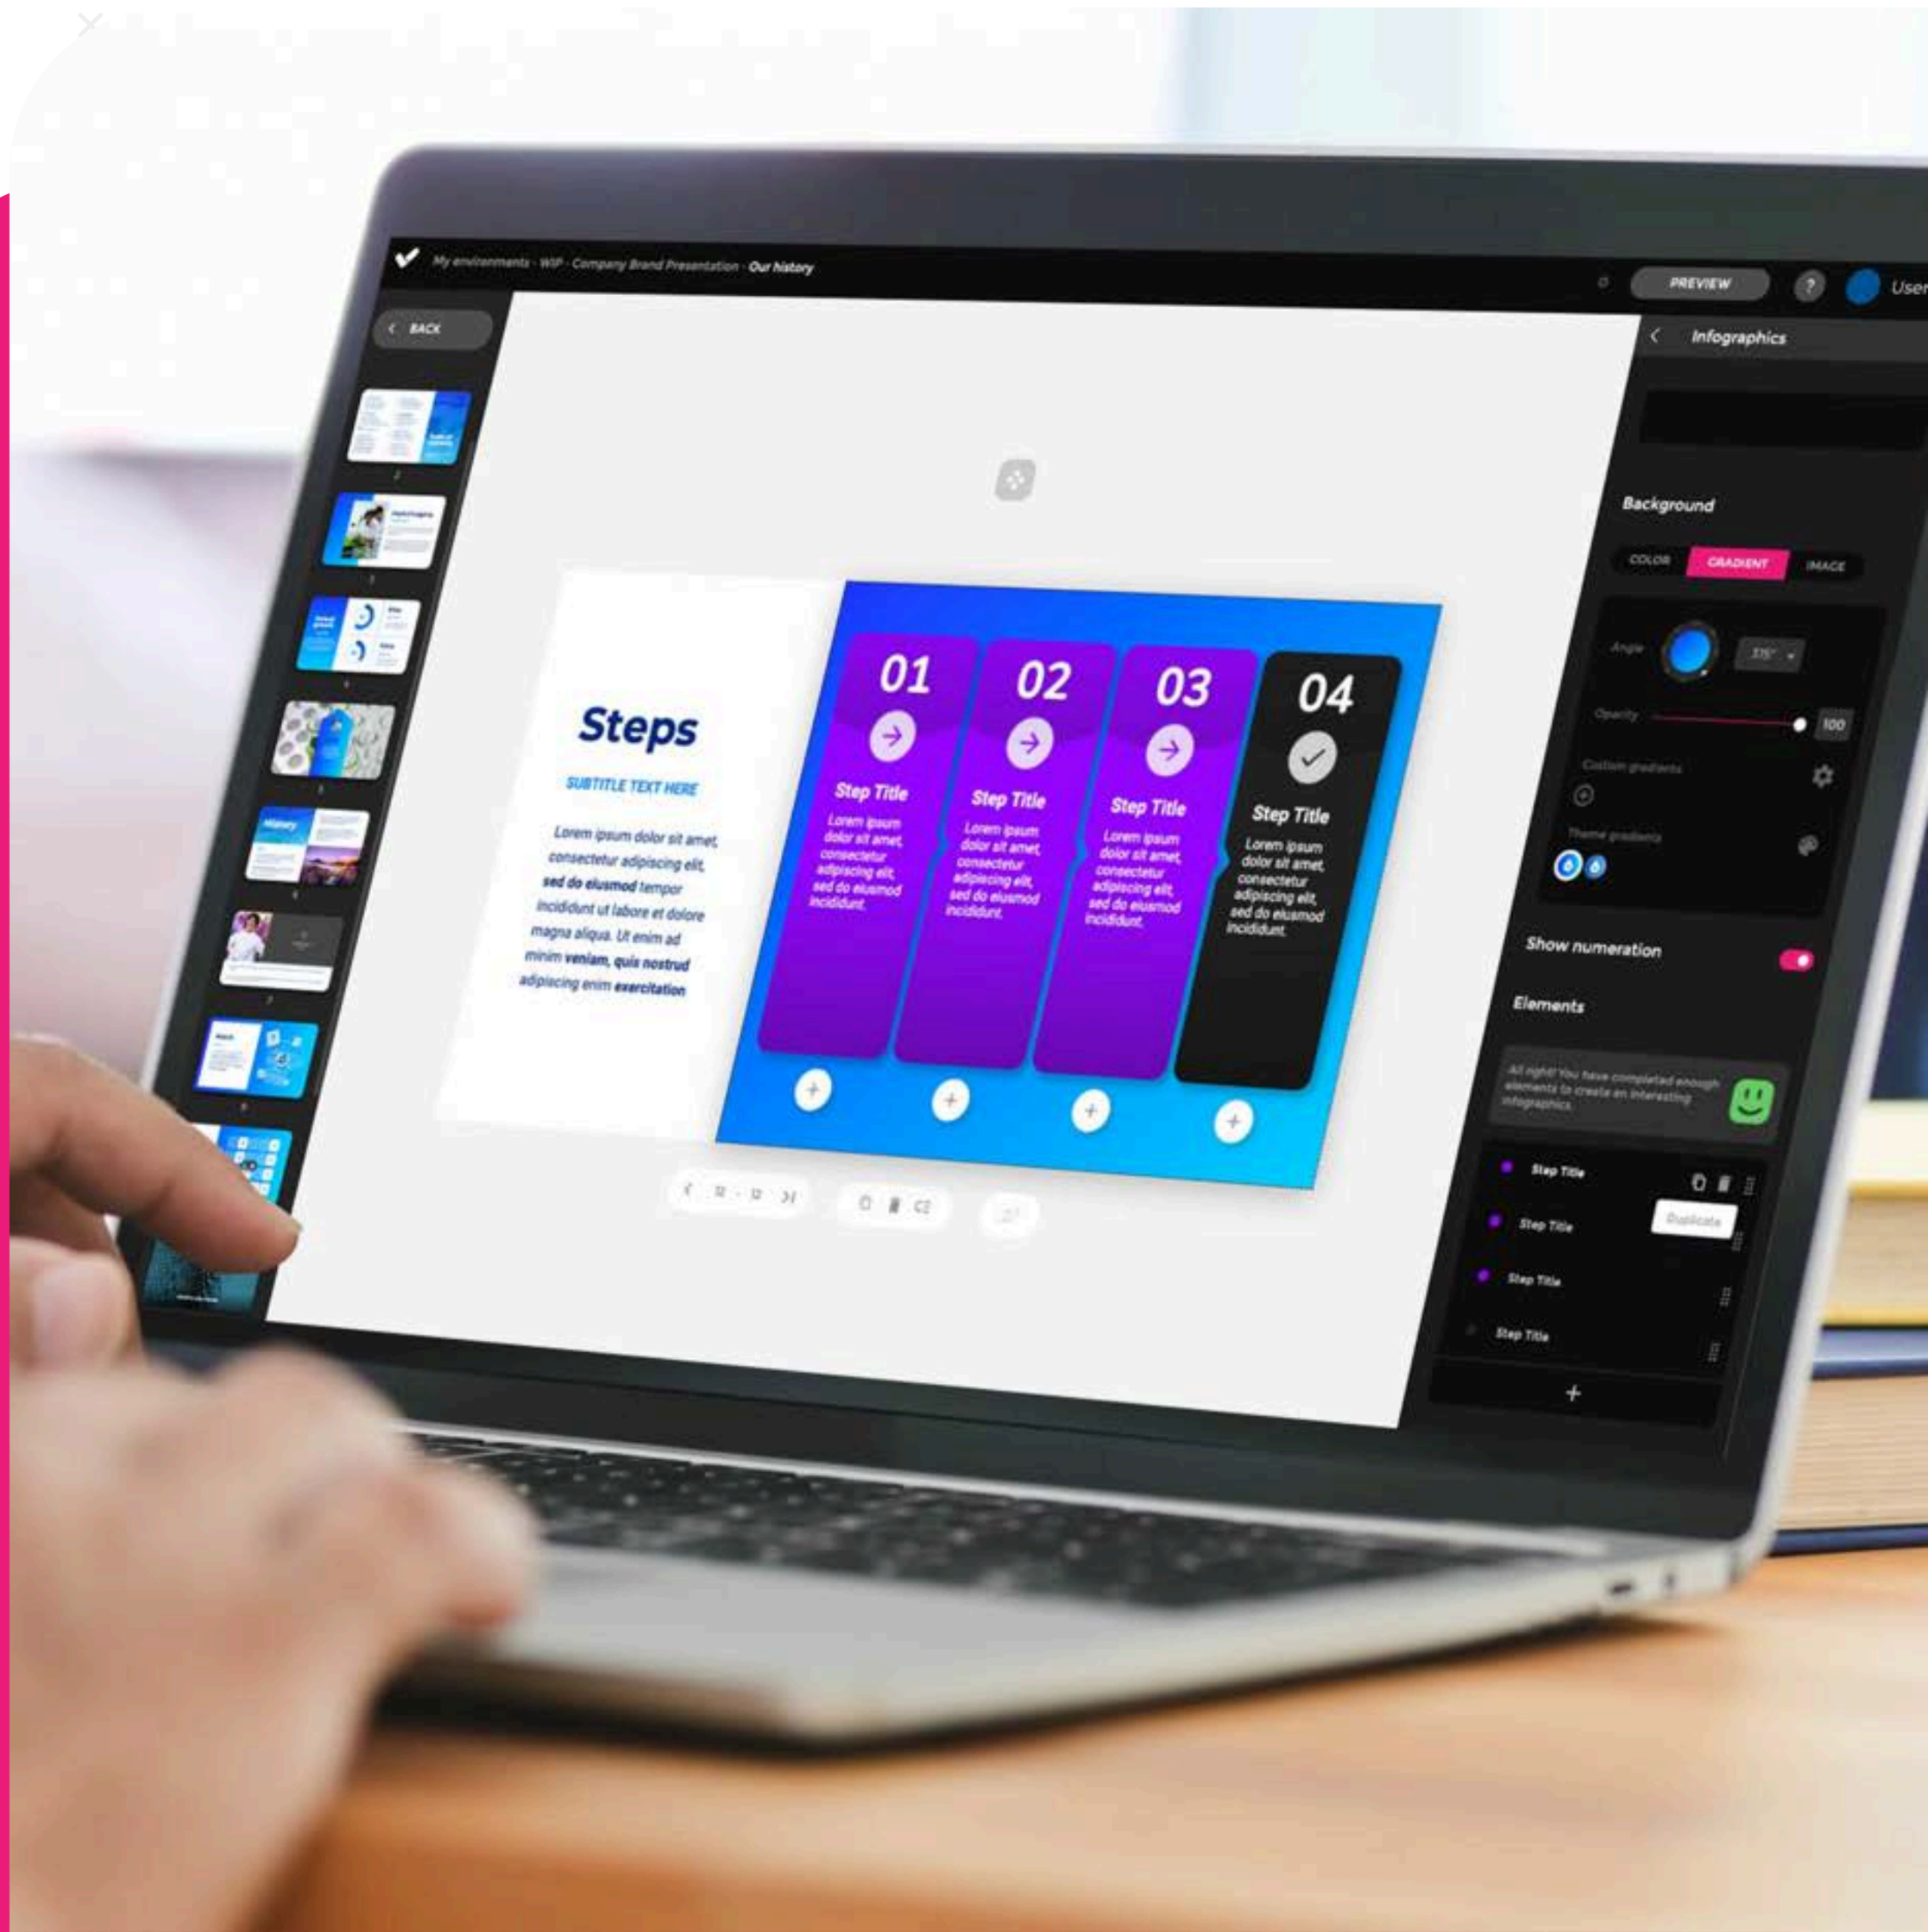
| Question | Yes | No |
|---|---|---|
| Is there sufficient contrast between text and background (minimum AA: 4.5:1)? | ☐ | ☐ |
| Does the layout remain functional when zoomed up to 200%? | ☐ | ☐ |
| Are font sizes and buttons large enough to be easily readable? | ☐ | ☐ |

* WCAG recommends a minimum contrast ratio of 4.5:1 for normal text. This ensures readability for users with visual impairments.

## Your final score

Count the number of “Yes” responses:

- **0–7 “Yes” → High Risk.** Your courses likely do not meet the European Accessibility Act requirements.
- **8–10 “Yes” → Partial Compliance.** Key areas still need improvement.
- **11–13 “Yes” → Strong Compliance.** You’re nearly aligned with EAA standards.



# isEazy Author: Create e-Learning courses that comply with the European Accessibility Act

Discover the #1 AI-powered authoring tool on the market. With its intuitive interface and powerful features, you can automatically create accessible courses that meet the highest accessibility requirements under EU law:

- Fully compliant: 100% WCAG Level AA and 80% Level AAA.
- Automatic accessibility, without sacrificing design or interactivity.
- Courses optimized for every user and device.
- Complete autonomy—no need for third-party support.

Avoid penalties. Request a demo and start creating truly accessible learning experiences.
